Education

M.Sc. (2011-2014)

Animal Physiology, Biology Department, Arak University, Arak, Iran.

Ph.D. (2016-2022)

Medical Physiology. Department of physiology and Neurophysiology Research Center, Faculty of Medicine, Shahid Beheshti University of Medical Sciences, Tehran, Iran.

Ph.D. research project: Investigation the effect of maternal separation stress on neuroendocrine and metabolic response to chronic social defeat stress along with evaluation of expression alterations of CRHR1 and FKBP5 and epigenetic modifications of FKBP5 in hypothalamus of young adult male rat offspring.

Research interests

- Neuroendocrinology
 - Behavioral Physiology
 - Molecular Biology
-

Research Experience

- Western blotting
- Molecular biology: Isolation and electrophoretic analysis of genomic DNA and RNA, Reverse Transcriptase-PCR, Methylation-specific PCR, Primer designing
- Glucose tolerance test, blood sampling and Pancreatic islet isolation
- ELISA, Enzymatic assays
- Preparation of histological slides
- Other techniques:
 - A. Social defeat stress
 - B. Behavioral assessments of anxiety, depression and learning and memory
 - C. Evaluation of sperm parameters

Teaching Experience

- Teaching laboratory physiology for students of medicine, Dentistry, Pharmacy. Shahid Beheshti University of Medical Sciences.
- Teaching medical physiology for students of paramedical students. Shahid Beheshti University of Medical Sciences.

Research projects (as a principal investigator PI)

- Investigation the effect of maternal separation stress on the induction of depressive like behavior and spatial memory deficits in response to adulthood chronic social defeat stress along with evaluation of HPA axis activity and hippocampal IL-1 β level in young adult male rat offspring. 2021. Grant No. 28929

شواری پژوهشی کمیته پژوهشی دانشجویان دانشگاه ع پ شهید بهشتی ۱۳۹۷ اتمام ۱۳۹۸

- Investigation the effect of maternal separation stress on neuroendocrine and metabolic response to chronic social defeat stress along with evaluation of expression alterations of CRHR1 and FKBP5 and epigenetic modifications of FKBP5 in hypothalamus of young adult male rat offspring. Grant No. 16909.

مصوب مرکز تحقیقات علوم اعصاب دانشگاه ع پ شهید بهشتی ۱۳۹۹ اتمام ۱۴۰۱

- Investigation the effect of maternal separation stress on oxidative stress markers in young adult male rat offspring in response to chronic social defeat stress. Approval code: IR.SBMU.REC.1397.103

مصوب دانشکده پزشکی دانشگاه ع پ شهید بهشتی ۱۴۰۰ اتمام ۱۴۰۱

Research projects (as co-investigator)

- Evaluation of the effect of stress during pre-pregnancy, pregnancy and lactation periods on lipid profiles and inflammation of the hippocampus and the role of possible changes of these factors in anxiety, depression and spatial memory in male rat offspring, Ethic code: IR.SBMU.PHNS.REC.1401.133

مصوب مرکز تحقیقات نوروفیزیولوژی دانشگاه ع پ شهید بهشتی ۱۴۰۲

Journal Publications
